Genova Smart Week : 27 Maggio 2016 SMART URBAN MOBILITY - CITIES OF THE FUTURE

Venerdì, 13 Maggio 2016

The **European Innovation Partnership (EIP) on Smart Cities and Communities** is Europe's key initiative to create a common **Market Place for Smart City solutions**. It brings together ~ 4000

partners from cities, regions, industries and research to increase partnering and synergies, to identify common projects and to boost demand innovative technologies and services. Through roll-out initiatives, public and private partners aim at replicating tested innovation at large scale. Innovative solutions for smart electro-mobility and mobility services are at the heart of the smart urban mobility action cluster, where the aim is to bring together up to 100 cities and their industry partners in replication action.

Outreach to regions and cities is a key priority. This workshop, which is organised by the European Commission. Directorate-General Mobility and Transport together with the EIP action cluster sustainable urban mobility, the city of Genoa and the Region of Liguria, invites committed partners of the EIP Smart Cities as well as everybody else interested to exchange information and discuss how to take forward innovations in smart electro-mobility and smart mobility services and contribute to the ongoing roll-out initiatives.

This meeting will:

- Provide participants with an opportunity to network and get an overview of the latest European policy developments related to smart cities and mobility
- Discuss how to advance promising innovative solutions and potentials for collaboration
- Join existing activities to roll out innovative solutions

For further information on this meeting please contact Ms Margaux Lempereur at alice.vancaillie@cecoforma.com, who is in charge of the organisation of this event. Registration is free of charge and subject to confirmation. This workshop is part of a larger smart cities and mobility outreach event on 27 May which also includes a mayors roundtable and practical demonstration activities.
